DETAILED ACTION

Claims 1-3, 5-7, and 34-42 are pending in this application.

Claims 34-42 do not read on the elected Specie (Specie I, figure 1). Therefore, claims 34-42 are withdrawn from further consideration as being drawn to non-elected subject matter.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Matson et al. (U.S. Patent 6,468,112).

As to claims 1-3, Matson discloses a circuit board (12, column 2, line 7) as shown in figures 1-2 comprising: a mechanism (16, column 2, line 9) comprising:

signal means for (wire traces 18, and circuitries formed in/on the circuit board 12) conducting a signal between the mechanism (16) and the circuit board (12); and

separation means (gaps 20, column 2, line 15) for facilitating detachment of the mechanism (16) from the circuit board (12);

identification means for (labels No.1-No.6, figure 1 shows the label No.3 and No.4) identifying the mechanism (16);

wherein the circuit board becomes at least partly non-functional if the mechanism is detached from the circuit board.

As to claims 5-7, Matson discloses in figure 1 the identification means being a circuit (conductor run (18), visible identification code (labels No. 3, No. 4), and being protected (by a molded connector 14) from being easily manipulated.

Response to Arguments

3. Applicant's arguments filed 08/11/06 have been fully considered but they are not persuasive.

Applicant argues:

Matson does not suggest "identification means" on a PCB.

Examiner disagrees. Figure 1 of Matson shows conductor runs (18) having identification means (labels No. 3, No. 4) of a plug (16) for providing positive mechanical locking of a connector (14) and the plug (16), further, the conductor runs formed on a PCB (12).

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2841

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
